With the exception of the way in which otherwise expressly provided in this document, the provisions of Section 3 and Section 4 together with any provisions which by their terms expressed upon periods after the resolution of this agreement, survives the resolution of this agreement for any reason. Manuals for Nikon Products / 2018/02 / 15 / ver.0.0 Page 2 Although the device does not support this download service, can be used to view download information. Download links can be sent by e-mail for download on a computer. Select your operating system. This software update program is for the customer's own property listed above (the product À ¢ ¢ -À "Effecto") and is only supplied to the acceptance of the listed below. Selecting an acceptance and by clicking On a downloada, you are required to have accepted the terms and conditions of the contract. Make sure you understand the terms of the agreement before the start of the download. ViewNX 2 is a navigation software application and modification of the image all- In-one for fixed images and movies. Nikon Transfer 2, which can be used to transfer images to a computer and image control utilization 2, which allows users to adjust and manage custom image checks, have been Incorporated in VIntX 2 and movie modification functions, including the one that allows you to cut movie movies, have also been included (Nikon Movie Editor). It was also reached a more fluid collaboration with Nikon Image Space, also the Nikon storage and image sharing service. This is the full version of Viignx 2.10.3 for Windows and Mac computers. If you are using ViewNX 2 this download will uninstall the existing version and install version 2.10.3. This software supports all Nikon D-SLR cameras, Nikon 1 and all Coolpix cameras with USB support. Make sure you have read and understand the terms of the license agreement before starting the download of this software from the links at the bottom of this page. Changes enabled with ver. 2.10.3 Changes that apply to the Windows and Mac Support versions for the D5500, À, Coolpix L31 (not released in Japan), Coolpix S3700 was added, Coolpix L32 and Coolpix À - S2900 (not released in Japan). Additional changes to the Windows version When the images have been converted into JPEG format using the Convert File function with the quality set to a good compression ratio or the highest compression ratio, the resulting JPEG images cannot be viewed in VIntNX 2, Capture NX 2 or Capture NX-D. This problem has been solved. Additional modifications to support Mac version for OS X version 10.10.1 have been added. OS X version 10.7.5 is no longer supported. Note file transfer using Nikon Transfer 2 - Image transfer via Nikon Transfer 2 not Possible with the following cameras. Use a card reader to transfer images to a computer for storage. COOLPIX 910, 900, 600, 300, 100 - Image transfer via the Nikon 2 transfer with the camera connected to the computer is not possible with the following cameras. Use a card reader to transfer images. - D1, D1X, D1H - Coolpix 990, 950, 880, 800, 700 - When a D4S with an XQD card and a CompactFlash card inserted in the memory card slots is connected to A A Computer while the camera is off, the computer may not recognize the XQD card when the camera is turned on. If it occurs, disconnect the camera from your computer, activate the camera, then connect it again to your computer. Restrictions on Nikon Movie Editor 1. Films up to 60 minutes long can be changed with the Windows version; Movies up to 30 minutes in length can be modified with the Mac version.À, À, 2. The following restrictions on the number of films and still images that can be added to the storyboard apply. Windows: a project containing up to 10 movies, or a total of 30 fixed films and images, can be previewed and exported. - When a movie a few seconds of length with the applied transition effects is added to the storyboard, the film file may not be correctly exported, even if it does not exceed restrictions on the number of films and still images. Mac - A project containing movies 4 H.264 (1920 Áf-1080) and 2 still images can be previewed and exported. However, when 720p and lower recorded H.264 movies are used, the number of files of films and still images that can be used in a project increases. - Furthermore, when only Motion JPEG movies (1080p) are used, a project containing up to 30 movies can be viewed and exported. 3. The movies recorded in a 1080 / 60i setting are managed as a 1080 / 30p movie. NRW (RAW) images When the images captured in a self-white balance setting and a NRW (RAW) image quality setting are improved using ViewNX 2, the results obtained may differ from those obtained with L NRW processing (RAW). D4S, D610, D3300 and D5300 display when the images acquired with D4S, D610, D3300 or D5300 are displayed at a magnification of less than 25%, the brightness in the preview of the RAW image and image output in TIFF format it could be different. Ratings applied with a Coolpix camera rating applied with a COOLPIX camera in playback mode does not reflect in ViewNX 2 or other applications that support evaluations. Movie reproduction H.264 under Mac colors will appear lighter in films played on a computer running Mac. Viewing images in MPO format shot in images in 3D MPO format Shot in 3D can be viewed only with a viewer who supports 3D images. COOLPIX L19, L20, S550, À, and S560 Model: SMILE The information on the scene mode are not displayed correctly in the metadata palette for images captured in smile mode. However, all other operations work properly. Images with Sidecar File ViewNX 2 processes images without using sidecar files. Therefore, the processing results will be different from those obtained by processing using NX-D Capture. Capture NX and Capture NX 2 - The image control utility 2 is installed with the installation of this software. However, the image control utility 2 cannot be started by Capture NX or Capture NX 2. - Picture saved pictures with preview only to incorporate Nef / NRW rescue preview in Capture NX 2 (ver. 2.3.0 or Subsequences) The preferences will appear grainy with display and printing from ViewX 2. Synchronize the Mac Data and Time version of the camera and time to the computer when the camera is connected (supported cameras only) The date and time of the camera will not be synchronized with The computer, even when synchronizes the camera date and the time to the computer when the camera is connected (only supported cameras) in the Nikon Transfer 2 preferences panel is checked, if the calendar is set to any option other than Gregorian in language and Computer system preferences panel formats. Installation in OS X Version 10.10 "Yosemite" VIntNX 2 utility and Picture Control Utility 2 applications (icons) cannot be added to the dock when these applications are installed on a Mac running OS X version 10.10 "Yosemite". In this case please add applications to the dock yourself according to need. Microsoft Windows® 8.1 Microsoft Windows Vista Microsoft Windows 7 (SP1) system requirements - only pre-installed versions. - Both 32-bit and 64-bit versions of Windows 8.1, Windows 7, and Vista are However on a computer running a 64-bit operating system, only VIntX 2 is Picture control Utility 2 NativeAAAAAAA, 64-bit applications. Mac OS X version Version 10.10.1 Mac OS X Version 10.9.5 of Mac OS X 10.8.5 CPU Fixed Images: from 1.6 GHz Corelon / Pentium 4 / Series Core or better. Film: Playback 3.0-GHz Pentium 4 or higher.
